Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following six patentably distinct species of the claimed invention:

Species A, Embodiment 1, drawn to a lightwave coupling device which may have only one photoluminescent medium and does not have an electrowetting medium (e.g. fig. 1).

Species A, Embodiment 2, drawn to a lightwave coupling device which may have only one photoluminescent medium and does have an electrowetting medium (e.g., fig. 12).

Species A, Embodiment 3, drawn to a lightwave coupling device which may have only one photoluminescent medium, does not have an electrowetting medium, and uses three or more electrodes (PG Pub paragraph 0042).

Species B, Embodiment 1, drawn to a device containing a plurality photoluminescent media and does not have an electrowetting medium (e.g., fig. 3a).

Species B, Embodiment 2, drawn to a device containing a plurality photoluminescent media and does have an electrowetting medium (e.g., fig. 12).

Species B, Embodiment 3, drawn to a device containing a plurality photoluminescent media, an electrowetting medium, and uses multiple electrodes (i.e., three or more electrodes). (See, e.g., fig. 12; PG Pub paragraph 0083, 0087).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic to all of the claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
